

Cleaning and Storage

Make sure to clean the inside of your Hydration Reservoir before the first use and after each use.

1. Fill your Reservoir with clean, warm, soapy water.
2. Gently shake Reservoir to cover inside with soap.
3. Rinse with clean, warm water.
4. Once the Reservoir is clean, be sure to air dry it.
Make sure the Reservoir is completely dry before placing in storage.
5. Store flat in a cool dry environment.
